

Backend Software Engineer

NovaLedger Technologies | Cairo, Egypt (Hybrid) | Full-time

ABOUT NOVALEDGER

NovaLedger Technologies builds the payments infrastructure behind checkout and payouts for over 400 merchants across the region. Our backend team owns everything from the public API to the ledger that reconciles every transaction - correctness and reliability are not optional here.

ABOUT THE ROLE

We're hiring a Backend Software Engineer to help design and scale the core services behind our payments platform. You'll design APIs, own data models end to end, and work closely with product and frontend engineers to ship features that merchants rely on daily.

WHAT YOU'LL DO

- Design and ship REST APIs that power our mobile and web clients
- Own the schema, performance, and reliability of our core PostgreSQL database
- Partner with product and frontend engineers to scope and deliver new features
- Participate in code review and a shared on-call rotation
- Improve observability - logging, metrics, and alerting - for the services you own
- Mentor junior engineers as the team grows

REQUIREMENTS (ESSENTIAL)

- 3+ years of professional software engineering experience building production backend systems
- Strong proficiency in Python, with hands-on experience in Django, Flask, or FastAPI
- Experience designing, building, and consuming REST APIs
- Solid experience with relational databases (PostgreSQL or MySQL), including schema design and query optimization
- Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent practical experience)
- Comfortable working in a fast-paced team with regular code review and on-call rotation

NICE TO HAVE (PREFERRED)

- Experience with Docker and containerized deployments
- Familiarity with a major cloud platform (AWS, GCP, or Azure)
- Experience with asynchronous task queues such as Celery or RQ
- Prior experience mentoring or leading junior engineers
- Exposure to CI/CD pipelines and infrastructure-as-code

- A relevant certification (e.g. AWS Certified Developer) or active open-source contributions

WHAT WE OFFER

- Competitive salary and equity
- Hybrid work model (Cairo office, 2 days/week on-site)
- Full health insurance for you and your dependents
- Annual learning and conference budget
- 25 days of paid annual leave

HOW TO APPLY

Send your resume to careers@novaledger.example with the subject line "Backend Software Engineer". We review applications on a rolling basis.
